

# THE FUTURE OF WORK IN A SMART CITY: EVOLUTION TO INNOVATION

**Date:** Tuesday 16th May 2017

**Time:** 8:30am–11.00am

**Venue:** Engine Shed, Station Approach, Temple Meads, Bristol BS1 6QH

Technology continues to evolve our businesses, in particular changing the way in which people can deliver their work and employers manage their workforce. For example, today, flexible working options are the new normal, and almost an expectation of staff. As things like flexible or agile working continue to become easier as a result of technology, how will this growing separation between employees impact business culture? What effect will this have on business success 30 years from now?

This is a great opportunity for HR, Legal and IT professionals in Private and Public sectors.

Our expert speakers are:

**Brian Pietras**, Hays plc, Head of Technology Ventures & Innovation

**Simon Winfield**, Hays UK&I, Managing Director West & Wales

**Thea Watson**, Hays UK&I, Marketing Director

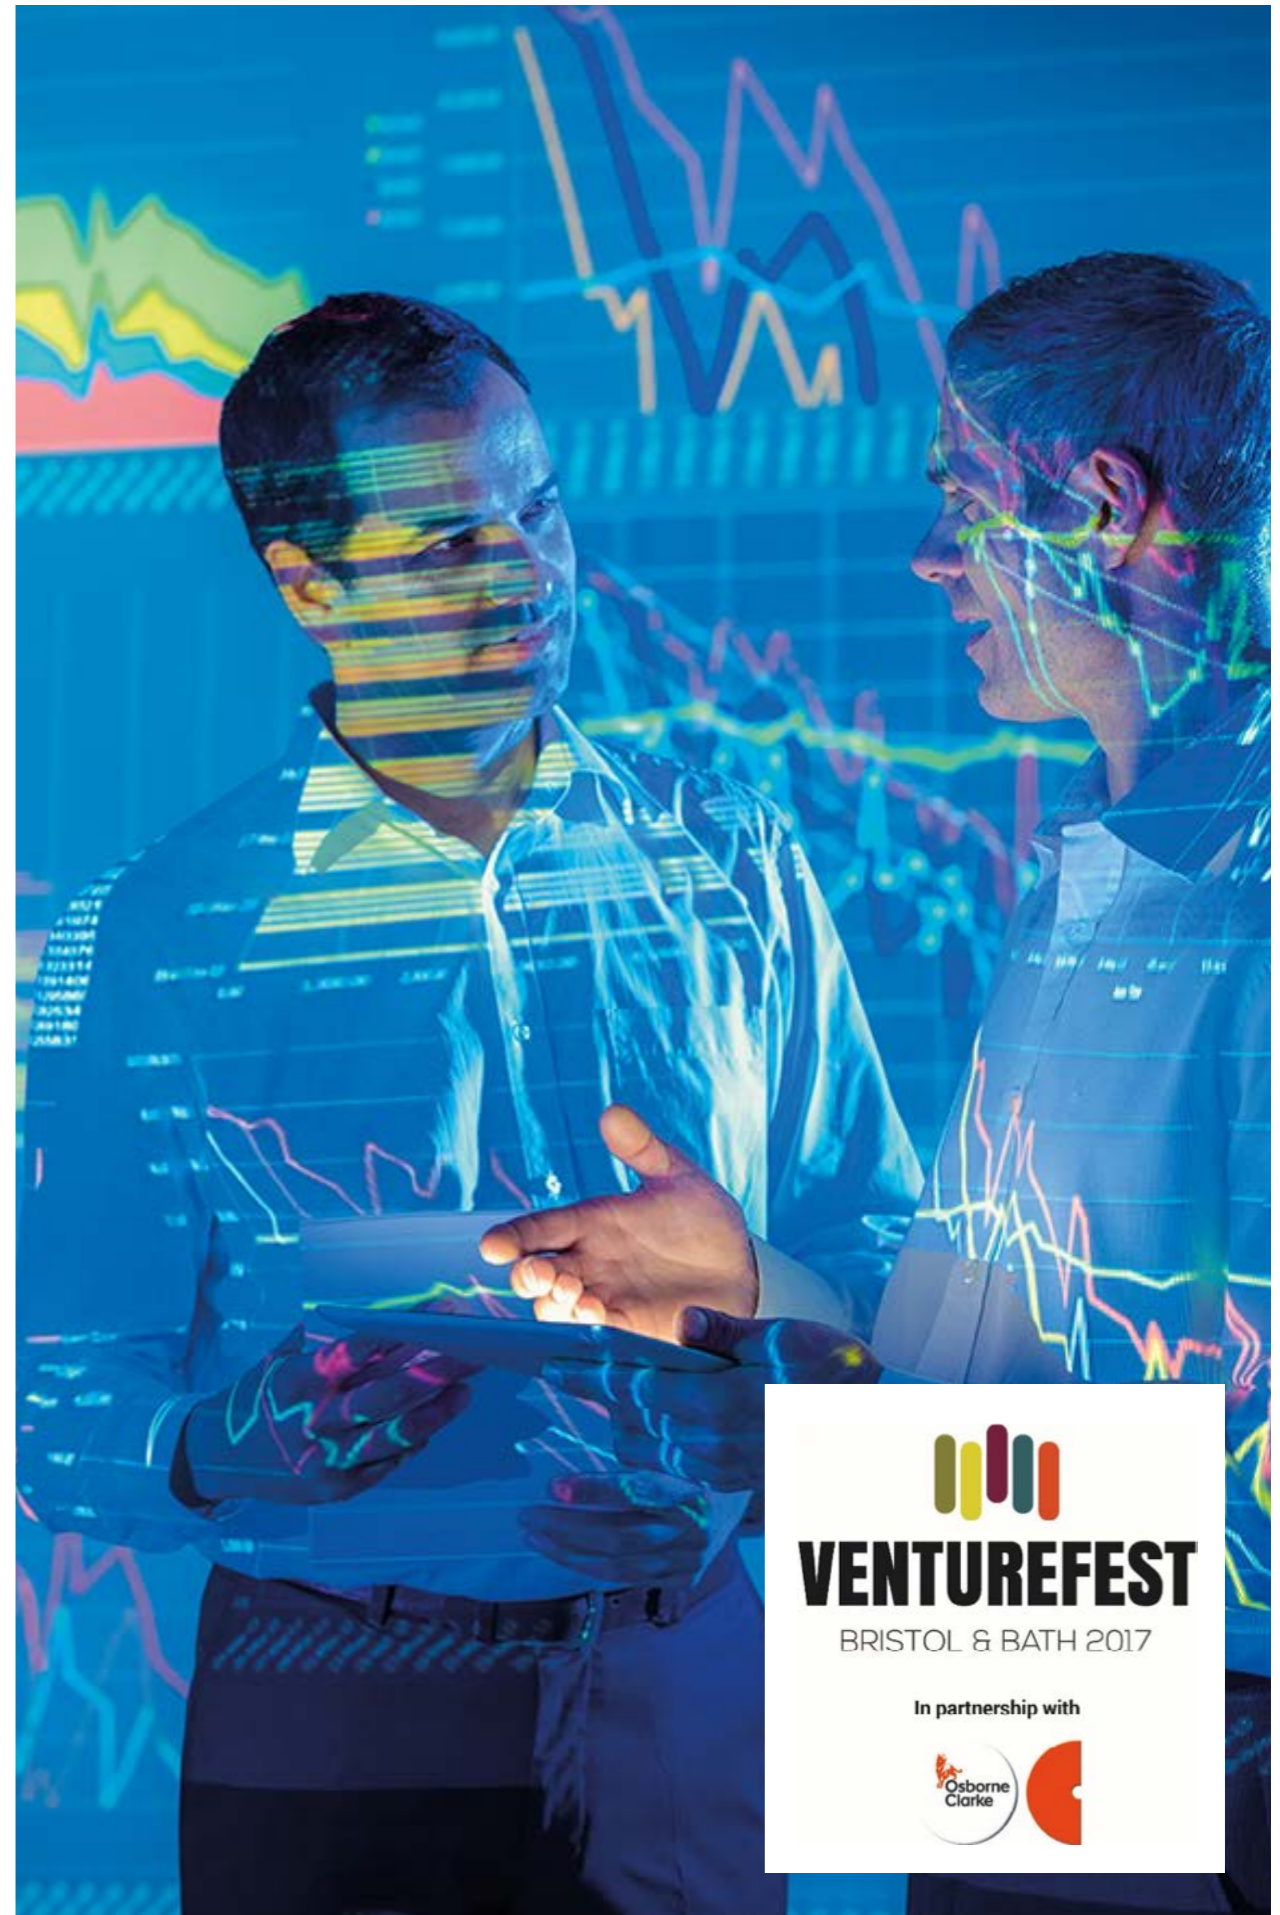

**Greg Chambers**, Osborne Clarke, Associate Director UK, Employment Law

---

**Join our seminar to understand what questions employers should be asking themselves now to be prepared for talent management and workforce planning in a Smart City in 2030. We look forward to welcoming you at Engine Shed.**
